

Varrans

Your viability

Overview

Varrans has unlimited resources with the capacity to deliver a wide range of projects to a multitude of clients in diverse markets.

We supply construction of fixed infrastructures, mining services, industrial facilities and structures for the continued development of the economics we are dealing with.

As a local company; we are familiarized with the Congolese market. We also outsource expertise whenever necessary. Our dynamic team of professionals are fluent in both English and French. They are dedicated to meet your expectations and requirements.

To serve you best, we have representations in South Africa and where our operations take us. We pride ourselves to offer adequate customer service, timely material delivery and specialized staff.

Maintenance

We offer products, project works, mining maintenance and expertise to our clients. We assign a team of dedicated and self managed staff to work solely on the project you require. We understand that large companies might have logistical issues and we adjust our teams to meet your individual requirements.

Varrans will supply documentation and equipment when needed; with in-house audits performed on a regular basis. Safety and compliance are very high on our agenda and we have established operating procedures and a good record of accomplishment.

Cleaning

Varrans supplies a range of steel surface, abrasive blasting and rust stripping. Painting the prepared surface ensures complete protection from the elements and is thus a necessity. Our materials can be supplied by our client, or sourced from alternative origin.

Scaffolding

Scaffold has become an intricate part of the construction industry. Safety being of utmost importance to us, we pride ourselves in utilizing only qualified and competent erectors and inspectors.

You can either require us to service your needs through supply of staff only .

Electrical Solutions

As a world-class provider of electrical and instrumentation solutions, specializing in industrial process plant service, we are committed in supporting our client to achieve a competitive advantage. This shall happen through a flexible and innovative approach of design, procurement, construction and commissioning.

Because exact calculations are needed to balance electrical currents and instrumentation, we offer qualified and competent staff to complete our project on time. And with safety remaining our priority, no short cuts are taken.

Hot insulation

Varrans provides insulation of pressure vessels and of thermal pipelines amongst other things. We offer the following different types of insulations : calcium silicate' ceramic fibre, fibre glass, mineral wool, nitrile rubber and polyethylene.

Pipes

Steel Pipe Installations

Because pipeline installation has been the only route in the past, it has not been financially viable for many companies to change their systems, and ultimately taking the less costly route of replacing sections of steel pipes.

Utilizing qualified Welders and Fitters, Varrans can repair, replace sections of pipelines, and even prepare areas and install complete lines; may it be over open surfaces or in an operational plant.

HDPE Pipe Line Installation

HDPE pipe is ideal for many different applications, including municipal, industrial, energy, geothermal, landfill and more. HDPE pipes are strong, durable, flexible and lightweight. When fused together, HDPE has a zero leak rate because the fusion process creates a monolithic HDPE system. HDPE pipe is also a more environmentally-friendly and sustainable option due to its non-toxic, corrosive and chemical resistant properties, its long design life and is suitability for trenchless installation methods for its flexibility.

We offer those pipe installations from 32 od to 1000 od, with a variety of welding including Extrusion Welding, Hot Gas welding, Spiket and Sleeve Welding, and also Butt Welding. No matter what the terrain offers, we have the solution to replace existing HDPE lines or prepare areas and install new pipe lines within an operational plant or overland.

Painting

Here at Varrans, we pride ourselves on the fact that we have a wide selection of different types of trades that we can offer to our clients, painting been one them! We are aware of how over the years paint seems to fade and crack and peel away, this environment here in the DRC is not friendly to any form of paint and we could be of assistance to our client, be it cleaning, sanding or scrapping down of old walls/pipes and refurbishing them for you or simply painting a container or an office block, there's no job to small or too big that we can't take on.

Civil Engineering

Varrans understands that the base of any structure ultimately stands on the integrity of a solid foundation. We pride ourselves in offering professional solutions in this regard.

From excavation to preparation of civil projects, through compaction phase, machinery to be hired or supplied by clients or depending on size of Project which we then can look at purchasing equipment to ensure completion on time.

We also provide online document control including

- QC reports;
- Safety Audits;
- Value Engineering;
- Cost estimation;
- Casting of Concrete;
- Excavating

Moreover, our affiliation with the Congolese Chamber of Commerce as an import-export company entitles us to sell cement on the DRC's market. We supply Zambezi and Chilanga cement 42.5 and 32.5. With our high volume of cement imports, we have privileged chartering rates from various shipping companies to offer you competitive prices

Import & Export

Considering the highly competitive environment, we are dedicated to provide the most affordable and locally-based transport solutions to our customers. Atlantics ensures that your smallest transporting need is handled professionally and delivered on time.

Our company offers truck transportation and warehousing as a link between manufacturers and consumers. We pick up, transport, store and deliver all your goods. Our services covers the Katanga Province , and with our sister company in South Africa, we are able to follow the entire process of loading , registering and checking of goods before cross-borders transportation throughout Southern Africa. Our experience in the field covers most goods, including perishables and heavy machinery.

All documents are cleared before-hand to guarantee safe clearance for your goods.

We also offer the same premium solution for exported goods.

Although the Kasumbalesa border is the preferred passage for customs clearance, our services encompass all Congolese borders; this to ensure professional handling of your import/export.

Further more, we offer mine site cleaning, as we can offer a truck to load any obsolete materials to be loaded and moved to other premises and/or be disposed of.

Panel erection of accommodation and office blocks.

Here at Varrans we have years of experience within our company on the erection of panels for all types of accommodation as well as office blocks. This service may include all civil, plumbing, electrical, roofing, door and window installations and tiling, be it vinyl tiles or ceramic tiles all can be provided, depending on the client's needs we can accommodate for all services if requested.

There are various sizes of panel available to our clients and various thicknesses that can be provided for various applications, this will depend on your needs and wants and our expert will be able to advise you on the most cost effective way forward. We also cater for container office modifications which we can line with panel for insulation purposes or simply refurbishing and modifying containers to suit your needs. As we know, time is of the essence and that the Panel option is a faster and more cost efficient way of erecting a building.

Safety Management System Implementation

As we all know Safety has become our number one priority in all types of organisations, as this is what our society expects from their employers all over the world, be it in accordance to our countries legislation or the companies standards, this is of up most importance to be in line with what is expected from us to fulfil our duties and implement safe work procedures and best practices. We at (company name) can assist with the implementation of a system that suits your current needs and we can offer you part time or even a permanent solution to ensure that all the necessary functions are carried out by your staff and that monthly internal audits are conducted as prescribed by legislation or by your clients. We can offer a full integrated system of ISO 14001 & OSHAS 18001 combination as there is very little difference between the two. This system will identify safety inductions for personal, roles & responsibilities and legal appointments that need to be put in place, monitoring of safe operating procedures as well as risk assessments that we deal with on a daily basis for continual improvement. This is just a few examples of what we can assist you to achieve and most importantly to strive to a positive health and safety culture within your organisation.
